

Welcome to Schulthess Switzerland

MAG Equipment Ltd

September 2008 factory visit to Schulthess in **Switzerland**

Just as you would expect from a quality product like Schulthess, the Swiss factory is a very impressive, state-of-the-art processing plant with no expense spared in design and technology.

All our group was shown the full operation from start to finish and the new designs and improvements made for today's market. Also within the factory the research and development department seemed years ahead and the team of experts were very interested in all our comments.

The new 7kg range is now in stock at MAG Equipment Ltd.

We are so confident with this range that we offer

2 years major parts warranty

- found nowhere else in the UK.
