

Huebsch®

Huebsch

50 & 75 lb
On-Premises
Drying Tumblers

Serving the Laundry Industry For Over 90 Years

Because on-premises laundries don't have time to deal with the hassles of maintenance and down time, Huebsch drying tumblers deliver reliable performance and much more. Innovative energy-saving features provide a more economical way to get the job done. With so many user-friendly features like a simple push-to-start button, Huebsch is an easy choice for your laundry facility.

Performance & Efficiency

The name Huebsch is synonymous with top performing drying tumblers. By balancing air-flow and heat input, Huebsch can deliver fast drying without wasting energy. Our **fast drying** will save you hours of extra work and our **superior energy efficiency** will give your utility budget a break.

Construction & Features

Huebsch dryers feature an **all-belt drive system** with a self adjusting tension idler. The drive system is constructed with metal pulleys and permanently sealed bearings for super quiet operation and low maintenance.

The operating controls are connected to the **modular control panel** by a single plug for reliability and convenient servicing. The wire cover eliminates the need for conduit; making the wiring easy to trace.

Our extra large doors are constructed of top-quality **stainless steel** to stand up to use in the toughest laundry environments. The large **reversible** door opening provides for efficient loading and unloading.

Huebsch tumblers feature a **self-cleaning lint screen** made of fine mesh. Lint is deposited into a large storage area for easy removal. The self-cleaning action maintains maximum airflow and promotes fast, efficient drying.

*C.A.R.E.® System** (Combustion Auto Response Equipped)

Huebsch offers an important new option in fire suppression. Our **Combustion Automated**

Response Equipped (C.A.R.E.®) system provides an initial response to suppress laundry combustion inside the tumbler cylinder and also can provide immediate notification to property management. **C.A.R.E.** is an independent sub-system that continually monitors the cylinder temperature as long as power is provided to the unit. If the **C.A.R.E.** system detects an excessive rise in temperature (a load fire) it will spray the load with water and provide a "system active" output signal. This signal may be connected to your property's alarm system, a light or other security alarm to ensure that even though you may not be on site, **C.A.R.E.** is still monitoring your operation.

** Option available on 50 & 75 lb models.*

User Friendly & Flexible

Because different businesses have different requirements, Huebsch offers a variety of controls to meet your needs.

Our **microprocessor control** is state of the art. Computerized models feature four preset automatic drying cycles with an option to further customize four additional automatic drying cycles. A fifth setting (no heat) also is available for items requiring special care.

Our **dual digital timer control** models enable operators to set drying time (0-60 minutes), cool down time (0-15 minutes) and temperature (High, Medium, Low, No Heat). New features include **one-touch cycle repeat**, **automatic extended tumble**, and **large digital time countdown display**.

Unmatched Warranty

At Huebsch, we're so confident that our quality drying tumblers are built to last, we offer a **THREE-year warranty**** on the entire machine.

** Parts only, labor not included. See Huebsch Warranty Bond for specifics.

3 year limited warranty*

Optional Features

Huebsch dryers feature many different options:

Narrow width (50 lb models only)

- Bolt-on angle option for narrow width access.
- For clearance through 34 1/2" door opening.

Reversing cylinder (3 phase only)

- Optional reversing cylinder drive helps eliminate tangling during the drying cycle.
- Perfect for drying oversized items such as sheets and table linen.

Bright annealed stainless steel cylinder

- Attractive mirror-like smooth surface reduces fabric abrasion.

To ensure the comfort of your laundry workers, Huebsch models are built with an **automatic backdraft damper**. This helps prevent air from entering the user area.

Additional Features

- Galvanized steel cylinder for long life
- Integrated motor overload protection
- Solid steel cap over top of the dryer
- Embossed steel cabinet for easy cleaning
- All major components easily accessible
- High temperature limit control
- Instant electronic ignition
- Superior exterior finish
