

T30 Stack Dryer

High Efficiency, Microprocessor Controlled

THE PROFESSIONALS CHOICE

SPECIFICATIONS

| Details | Units | T30 |
|--------------------------|---------------------------------------|---|
| Capacity | Kg(lb) | 2 x 14(30) |
| Height | mm | 2042 |
| Width | mm | 790 |
| Depth - Gas/Elec | mm | 876 |
| Depth - Steam | mm | 936 |
| Depth (with doors open) | mm | 1639 max |
| Net Weight Gas/Elec | kg | 249.5 |
| Net Weight Steam | kg | 263 |
| Drum Volume | m ³ | 0.31 |
| Door Opening Ø | mm | 492 |
| Control | Microprocessor | Phase 8 |
| Heating | Gas/Steam/Elec | |
| Electrics - Gas model | Volt/ph/Amp | 240/1/13 |
| Electrics - Elec model | Volt/ph/Amp | 415/3/50 |
| Electrics - Steam model | Volt/ph/Amp | 240/1/13 |
| Power (Electric) | Kw | 27 |
| No. of Water Connections | cold | 1 |
| Size of Water Connection | "BSP | ³ / ₄ |
| Gas Rating | Kw (Btu/hr) | 16.1 (55,000) per pocket |
| Connection Size | "BSP | ³ / ₈ x 2 |
| Steam Rating | Kg/hr (lb/hr) | 28.58 (63) |
| Connection Size | "BSP Supply / Ret | ¹ / ₂ / ¹ / ₂ x 2 |
| Airflow | m ³ (ft ³)/min | 10.19 (360) per pocket |
| Exhaust | ømm | 150 x 2 |
| Ventilation/Make Up | m ² (in ²) | 0.07(110) |

T30 Stack Dryer

The uniquely designed T30 Stack dryer is ideal for installation and use in areas restricted in space and superbly combines efficiency, economy and safety. Microprocessor controlled with LCD display for ease of programming and less user error, the dryer is one of the most efficient available saving up to 30% on gas over conventional models. Auto dry cycles prevent energy wastage and cut down on ironing and finishing.

Features

LCD display
Microprocessor control

Large lint drawers
HSI ignition
Large heavy duty doors

Slanting rib system in drums

Cylinders
Axial air flow system

Reversing drums
55,000 BTUs

Benefits to customer

Displaying individual cycles for ease of use - optimum programming, less user error.

Simple one-touch operation with pre-programmed cycles. Tailor-made cycles can also be stored.
'Clean Lint Filter' prompt for maximum efficiency. Self-diagnostic error codes for easy fault finding.
Auto dry cycles prevent energy wastage and cut down on ironing and finishing.

More efficient drying, easy to clean.

Fast Hot Surface Ignition reduces running costs.

Robust steel doors with gasketless glass and high density, tamper-resistant seal for safety and long life.
Easy loading of bulky items.

Prevents loads balling up by tumbling the load from the back of the baskets to the front for the best drying results.

Stainless steel drums for durability and hygiene.

Giving maximum drying efficiency and fast results, reducing running costs over conventional air flow dryers.

No tangling and more even drying for larger items.

Economic 55,000 BTUs per basket for fast drying.

SAFE - Sensor Activated Fire Extinguishing system

SAFE is a unique system specially designed to eliminate serious fires which start in tumble dryers. The Sensor Activated Fire Extinguishing system combats blazes which are often caused by spontaneous combustion or small loads that are over-dried.

SAFE is fast and efficient. When a fire starts in a dryer drum, two sensors detect the change in temperature and activate a sophisticated water vapour mechanism.

The vapour douses flames within seconds and the drum rotates, exposing and soaking all laundry to ensure that the fire is completely extinguished. The entire process takes just three minutes and if the fire restarts for any reason, the vapour mechanism reactivates. A great advantage of SAFE is that the risk of major damage to dryer and property and flooding to premises is eliminated.
